

The idea of taping hours of programming for our 2 smallest of small (micro) market stations on a daily basis and retaining that for a period of time places a very unnecessary burden on limited financial and staff resources. Furthermore we do not and would not air the kind of objectionable programming that would require such an onerous burden. We cannot even play certain country music songs that are in the top 10 on the music charts without receiving complaints and thus we do eliminate such songs from our playlists.

The expense and burden on a small market radio statio with limited staff would actually work counter to our and the commission's goals. That being to invest our staff time and fiancial resources in providing much needed community service to our area.

This is simply a case of punishing the innocent for the sins of a few.
